

BRAIN MRI STUDY

If you are ≥ 18 years old and you have been diagnosed, or are suspected to have a primary brain tumor and are a candidate for surgery, you may be eligible to participate in a research study to collect information from your Brain MRI exam to help improve early detection and understand brain tumor metabolism.

If you choose to participate, you will have a 60 minute Brain MRI as part of a routine pre-surgical workup **plus** an additional research MRI for up to 15 extra minutes.

There is no fee to participate in the study. The study will pay for the entire 75 minute MRI exam.

For more information on how to enroll in this study, please inform your treating physician or surgeon and contact our study team:
